Dear colleagues,

A pioneer and master in aesthetic-plastic surgery, Axel-Mario Feller, celebrates a “milestone birthday” in 2011. As Axel represents a wonderful colleague and an intimate friend to us, we felt like organizing an outstanding scientific symposium for him – as he has done already so many times for us.

Breast surgery to many of us is a main topic in our professional lives. We all are involved in reconstructive and aesthetic procedures, preferring our personal methods. To see beyond our daily routine, we are planning live surgery to stimulate some controversy: DIEP flap vs. pedicled TRAM flap, implant reconstruction plus matrix vs. implant plus latissimus flap, anatomical vs. round implants, vertical vs. inverted T mammaplasty.

We are positive that many distinct plastic surgeons will follow our invitation for an excellent faculty to set the highest standards in reconstructive and aesthetic breast surgery. And of course, we hope that many plastic surgeons will participate at this important symposium, not only for the purpose of education, but also for the honor of Axel-Mario Feller, whom we all want to thank for his contributions to our specialty.
